This book is a unique publication that gives a global overview of international tax disputes on double tax conventions and thereby fills a gap in the area of tax treaty case law. It covers the thirty-eight most important tax treaty cases which were decided in 2010 around the world. The systematic structure of each case allows the easy and efficient study and comparison of the varying application and interpretation of tax treaties in different regimes. Never before have tax treaty court decisions around the world been presented in such a comprehensive and structured way.

### List of contents:

- Personal and substantive scope (Art 1, 2 and 4 OECD Model)
